ICR B160

Stereo Voice Recorder/MP3 Player/Data Storage Device

The new ICR B160 is Sanyo's first digital product to use an advanced built-in stereo microphone to produce high quality MP3 recordings. This handy device also has the ability to playback MP3 / WMA music and store data files directly from your computer

The **ICR B160** can record over 4 hours mono and over 2 hours stereo. Connect the **ICR B160** to your PC and transfer recordings for playback, storage or email. Files from your computer can also be transferred to the **ICR B160**, providing a portable storage solution for all your Word documents, PowerPoint presentations, Excel spreadsheets or any other data you need to take with you for use at your destination.

Stereo microphone and earphone sockets allow you to discreetly record or listen to confidential information or enjoy your music on the move.

The stylish LCD display allows you to easily navigate through the settings of the **ICR B160** and retrieve stored information quickly, giving you total control.

This ultra compact recorder has a wealth of features contained within its smooth lines, making it an extremely attractive addition to the digital recording market in more ways than one.
